

Results shown by the students of DPS (East) Ahmedabad

Graph showing direct correlation of improvement in Rank with planned effort in Aasanka Course

*The above data is from Olympiad competition

Notes:

1. The correlation of planned 'effort' on Aasanka and corresponding improvement in 'Rank' is evident.
2. Students need proper study schedule on Aasanka so that compliance and hence performance improves.
e.g.- Yash Shah and Kishore Prajapati have spent very little time with corresponding lesser improvement
 - Utsav Jain, Shashwat Verma, Faizal Somani and Anamika Singh have spent more time, with proper study plan corresponding to greater improvement
 - Ishan Bhatt has spent time on Aasanka yet his shift in rank is negative. This is due to his random work with no proper study plan
3. We need to ensure students spend sufficient time on Aasanka so that improvement is uniform. For this to happen we need:
 - A. Dedicated period for Aasanka in School timetable
 - B. Dedicated 'Xpand' room where students come for comprehensive learning
 - C. Parents awareness so that student get time to study at home.
